

XUZHOU (COLAR) WANG

Philadelphia, PA | xuzhou.wang.upenn@gmail.com | linkedin.com/in/xuzhou-wang

EDUCATION

UNIVERSITY OF PENNSYLVANIA	Philadelphia, PA
<i>Master of Science in Systems Engineering</i>	Aug. 2025 – Aug. 2027 (Expected)
• Relevant Coursework: Marketing Analytics, Statistics for Data Science, Applied ML, Simulation Modeling	
UNIVERSITY OF NOTTINGHAM	Nottingham, UK
<i>Bachelor of Science (Hons) in Financial Mathematics</i>	Sep. 2022 – Jun. 2025
• Award: International Orientation Scholarship (Top 5%) • Relevant Coursework: Risk Management, Mathematical Finance, Statistical Inference, Stochastic Models	

TECHNICAL SKILLS

Data Analysis & Engineering: SQL (Window Functions, Complex Joins), Python (Pandas, NumPy, Scikit-learn), R, ETL Pipelines
Cloud & Tools: AWS (EC2, S3), Tableau (Dashboarding), Git, A/B Testing Frameworks
Modeling & Strategy: Statistical Hypothesis Testing, Market Segmentation, API Integration, Risk Modeling
Languages: English (Professional), Mandarin (Native)

PROFESSIONAL EXPERIENCE

KITCHENSURVIVOR (AI IOS APP)	Philadelphia, PA
<i>Founder & Product Analyst</i>	Nov. 2025 – Present
• Product Analytics & AI: Increased user engagement by 25% by defining interaction KPIs and leveraging GenAI APIs to process user queries; analyzed SQL logs to identify and resolve friction points. • Strategic Trade-off Analysis: Enhanced retention rates by conducting a quantitative cost-benefit analysis between model performance and latency, driving data-informed decisions to optimize response architecture. • Performance Optimization: Improved user satisfaction scores by defining success metrics for app stability and leading engineering efforts to reduce latency by 40%.	
KYRATON HOME (UK) LTD.	London, UK
<i>Co-Founder & Head of Analytics</i>	Jun. 2023 – May 2025
• A/B Testing Strategy: Scaled monthly sales to 100+ units by designing multivariate testing frameworks and utilizing statistical hypothesis testing to optimize semantic targeting for high-LTV market niches. • SQL-Based Automated Targeting: Boosted Advertising ROI (ROAS) by 20% by engineering an automated targeting engine that defined SQL-based behavioral segmentation logic communicating directly via the Amazon Ads API. • Inventory Modeling: Improved working capital efficiency by 15% by developing a stochastic inventory forecasting model to align procurement schedules with dynamic demand signals.	
CHINA GALAXY SECURITIES CO., LTD	Shanghai, China
<i>Quantitative Research Intern</i>	Jul. 2024 – Sep. 2024
• Risk Modeling: Achieved a 30% uplift in forecast stability by establishing rigorous validation protocols and regime-aware stress testing to mitigate downside risks in volatile market conditions. • Quantitative Strategy: Delivered a 50% simulated annual return by developing a predictive modeling framework that combined Machine Learning algorithms with market volatility signals to capture complex market alpha. • Data Infrastructure: Streamlined real-time investment analysis by designing a scalable financial data pipeline that ingested and normalized multi-frequency market feeds.	
UNIVERSITY OF NOTTINGHAM	Nottingham, UK
<i>Team Lead – AI-Driven Crypto Portfolio Optimizer</i>	Oct. 2024 – Mar. 2025
• Predictive Analytics: Reduced forecasting error by 90% through advanced feature engineering and rigorous backtesting of deep learning models to identify high-probability return signals. • Strategic Optimization: Achieved a Sharpe Ratio of 1.3 (simulated) by translating volatility data into actionable allocation strategies, guiding automated rebalancing decisions across 17 distinct assets. • Risk Assessment: Mitigated downside exposure by establishing statistical validation protocols and performing stress testing to ensure data integrity.
