

XUZHOU (COLAR) WANG

xuzhou.wang.upenn@gmail.com • www.linkedin.com/in/xuzhou-wang

EDUCATION

University of Pennsylvania, USA

M.S. in Systems Engineering

Relevant Coursework: Marketing Analytics, Applied ML, Stats for Data Science, Simulation Modeling

Philadelphia, PA

Aug.2025 – Aug.2027 (Expected)

University of Nottingham, UK

B.S. Hons in Financial Mathematics

Relevant Coursework: Statistical Inference, Risk Management, Mathematical Finance, Fin Econ, Stochastic Models

Award: International Orientation Scholarship (Top 5%)

Nottingham, UK

Sep.2022 – Jun.2025

2022/2023/2024

Professional Experience

Amazon Retailer Startup | Co-Founder & Chief Strategist | London

Jun.2023 – May.2025

- Scaled monthly sales volume to 100+ units by orchestrating a data-driven Go-to-Market strategy utilizing keyword A/B testing and semantic analysis to capture high-GMV kitchenware segments and maximize product discoverability
- Boosted Advertising ROI by 20% by spearheading the development of an automated targeting engine defining SQL-based behavioral segmentation logic to pinpoint high-value user cohorts and optimize spend efficiency via Amazon Ads API
- Accelerated inventory turnover by 15% by architecting a predictive supply chain product integrating dynamic demand forecasting with safety-stock models to mitigate lead-time volatility and resolve stock-out bottlenecks

China Galaxy Securities Co., Ltd | Quantitative Research Intern | Shanghai

Jul.2024 – Sep.2024

- Delivered a 50% simulated annual return by productizing a hybrid LSTM-XGB trading framework synthesizing deep learning architectures with gradient boosting to capture complex market alpha
- Achieved a 30% uplift in forecasting performance by defining rigorous validation protocols including regime-aware stress testing and time-series cross-validation to ensure product reliability under volatile conditions
- Reduced data latency and enabled high-fidelity feature engineering by architecting a scalable financial data infrastructure to ingest and normalize multi-frequency market feeds for downstream model consumption

CITIC Futures Co., Ltd | Futures Department Intern | Shanghai

Dec.2023 – Feb.2024

- Generated 15% returns above benchmark by prototyping Python strategies to derive actionable product insights
- Mitigated legal and operational risks by establishing a compliance framework for investment governance

China International Capital Co., Ltd | Investment Bank Intern | Shanghai

Jun.2023 – Jul.2023

- Identified semiconductor market trends to guide strategy by conducting quantitative analysis via Wind
- Facilitated IPO prospectus delivery by validating data accuracy and producing analytical documentation

SELECTED PROJECTS

KitchenSurvivor | Solo Founder & Product Lead

Nov. 2025 – Present

- Secured 100+ App Store ratings and increased task completion by 25% by translating qualitative focus group insights into a dual-filter logic that resolved critical user friction points
- Reduced perceived latency by 40% and guaranteed data privacy by orchestrating a hybrid Edge-Cloud pipeline integrating on-device OCR with DeepSeek LLM via NDJSON streaming
- Eliminated background battery drain and reduced load times to near zero by engineering a high-availability lifecycle management system using structured concurrency and Optimistic UI patterns

Campus-Scale Img2GPS Localization | University of Pennsylvania | Project Lead

Oct. 2025 – Dec. 2025

- Directed the product strategy for a high-precision geolocation system achieving a 29.7% reduction in error by prioritizing architectural optimizations to enhance global navigation accuracy
- Optimized inference efficiency for resource-constrained environments by defining a stage-wise adaptation strategy that reduced model parameters by 96% and accelerated convergence by 2.5x

AI-Driven Crypto Portfolio Optimizer | University of Nottingham | Team Leader

Oct.2024 – Mar.2025

- Reduced forecasting error by over 90% by conceptualizing a market-adaptive prediction engine that synthesized deep learning with volatility signals to capture actionable return patterns in unstable markets
- Delivered a 0.2 expected return by architecting a systematic portfolio allocation product that combined dynamic risk estimation with model-driven forecasts to automate rebalancing across 17 assets

SKILLS, LANGUAGES & INTERESTS

- **Development & AI:** Python (PyTorch, Pandas), Swift (iOS/SwiftUI), SQL, LLM Integration (DeepSeek API)
- **Product & Tools:** Figma (UI/UX), Firebase, JIRA, Tableau, Excel, Wind Terminal
- **Languages & Interests:** English (Full Professional), Mandarin (Native); Competitive Badminton, Hip-hop Dance
