

XUZHOU (COLAR) WANG

Philadelphia, PA | xuzhou.wang.upenn@gmail.com | linkedin.com/in/xuzhou-wang

EDUCATION

UNIVERSITY OF PENNSYLVANIA <i>Master of Science in Systems Engineering</i>	Philadelphia, PA Aug. 2025 – Aug. 2027 (Expected)
• Relevant Coursework: Marketing Analytics, Applied ML, Stats for Data Science, Simulation Modeling	
UNIVERSITY OF NOTTINGHAM <i>Bachelor of Science (Hons) in Financial Mathematics</i>	Nottingham, UK Sep. 2022 – Jun. 2025
• Award: International Orientation Scholarship (Top 5%) • Relevant Coursework: Risk Management, Mathematical Finance, Statistical Inference, Stochastic Models	

EXPERIENCE

KITCHENSURVIVOR (AI IOS APP) <i>Solo Founder & Product Analyst</i>	Philadelphia, PA Nov. 2025 – Present
• Data Pipeline: Reduced perceived latency by 40% by orchestrating a hybrid Edge-Cloud pipeline integrating on-device OCR with DeepSeek LLM via NDJSON streaming protocols • User Analytics: Secured 100+ App Store ratings and increased task completion by 25% by translating focus group insights into a dual-filter logic to resolve critical user friction points • Performance Engineering: Eliminated background battery drain and reduced load times to zero by engineering a high-availability lifecycle management system leveraging Swift-based structured concurrency	
KYRATON HOME (UK) LTD. <i>Co-Founder & Head of Analytics</i>	London, UK Jun. 2023 – May 2025
• SQL-Based Segmentation: Boosted Advertising ROI by 20% by spearheading an automated targeting engine defining SQL-based behavioral segmentation logic communicating directly via the Amazon Ads API • Predictive Modeling: Accelerated inventory turnover by 15% by architecting a supply chain product integrating dynamic demand forecasting algorithms with safety-stock inventory management models • A/B Testing: Scaled monthly sales to 100+ units by orchestrating a Go-to-Market strategy utilizing keyword A/B testing and semantic analysis to maximize organic product discoverability	
CHINA GALAXY SECURITIES CO., LTD <i>Quantitative Research Intern</i>	Shanghai, China Jul. 2024 – Sep. 2024
• Machine Learning: Productized a hybrid LSTM-XGB trading framework synthesizing deep learning architectures with gradient boosting tree methodologies to deliver a 50% simulated annual return • Data Infrastructure: Architected a scalable financial data infrastructure to ingest and normalize multi-frequency market feeds, effectively reducing data latency for downstream real-time consumption • Model Validation: Achieved a 30% uplift in forecasting performance by defining rigorous validation protocols including regime-aware stress testing and rolling walk-forward cross-validation	
UNIVERSITY OF PENNSYLVANIA <i>Project Lead – Campus-Scale Img2GPS Localization</i>	Philadelphia, PA Oct. 2025 – Dec. 2025
• Optimization Strategy: Achieved a 29.7% reduction in error for a high-precision geolocation system by directing product strategy and prioritizing architectural performance optimizations • Resource Efficiency: Reduced model parameters by 96% to optimize inference efficiency for resource-constrained environments by defining and implementing a custom stage-wise adaptation • Technical Analysis: Accelerated model convergence by 2.5x through rigorous trade-off analysis between computational overhead and high-fidelity spatial localization accuracy	

ADDITIONAL INFORMATION

Programming & Data: Python (Pandas, NumPy, Scikit-learn), SQL, Swift (iOS), R, HTML/CSS
Analytics & Tools: A/B Testing, Tableau, Amazon Ads API, DeepSeek LLM, ETL Pipelines, JIRA
Languages & Interests: English (Professional), Mandarin (Native); Competitive Badminton, Hip-hop Dance
